Katrina Schwartz

Eleven years ago Chris Lehmann and a committed team of educators started Science Leadership Academy (SLA), a public magnet school in Philadelphia that focuses on student inquiry through projects in a community that cultivates a culture of care. The school has been so successful over the last decade that the district has tapped Lehmann to help other schools get started or transform themselves.

“We’ve learned a lot and it’s been fascinating for me thinking about what it was like to go through the SLA process and then working with people who have different missions

“We’ve learned a lot and it’s been fascinating for me thinking about what it was like to go through the SLA process and then working with people who have different missions

educators started Science Leadership Academy (SLA), a public magnet school in Philadelphia that cultivates a culture of care. The school has been so successful over the last decade that the district has tapped Lehmann to help other schools get started or transform themselves.

ng about what it was like to go through the SLA process and then working with people who have different missions
